

The Rod Walker Memorial Endowment Fund

Prof Rodney Walker (1969-2011) world leading researcher, passionate educator and Australian pioneer of civil unmanned aircraft systems.

Professor Rod Walker's vision was to see unmanned aircraft being routinely used for the benefit of all Australians. His world leading research and advocacy towards the realisation of this vision established the foundations for an emerging and prosperous industry.

The Rod Walker Memorial Endowment Fund was established to ensure that the legend of Rod Walker and his selfless commitment to industry, the community and students continues in perpetuity.

Donating to *The Rod Walker Memorial Endowment Fund* will secure financial support far into the future, encouraging and recognising those individuals and organisations demonstrating excellence in the pursuit of Rod's vision.

You can help us to keep Rod's dream alive and to honour Rod's name for generations to come by making a financial contributing towards the establishment of the Fund. Even a small contribution, which would take but a moment, could last a lifetime.

For more information on the *Rod Walker Memorial Endowment Fund*, the legend of Rod Walker and how to make a contribution towards the establishment of the Fund, please visit the ARCAA website:
