

Safely Managing Australia's Rapidly Changing Skies

Michelle Bennetts, Executive General Manager, Customer Service Enhancement, Airservices Australia

New users across all levels of airspace

Our Low Level Airspace Management Program

Boundary
Integration

- UAV surveillance and identification and UTM/ATM system integration

Information
Exchange / UTM
Development

- Safe and effective coordination of the low altitude ecosystem and integration with conventional airspace users
- Centralised data platform for information sharing

Airspace Design /
Route Structures

- Understanding our changing role
- Preparing to design air traffic corridors for UAV use
